

Special Issue

Knowledge-Driven Sustainability, Green Innovation, and Digital Technologies

Message from the Guest Editors

At this critical juncture for our planet, the confluence of green innovation and digital technologies within supply chain and logistics management emerges as a key lever for sustainable progress. This Special Issue, "Knowledge-Driven Sustainability, Green Innovation, and Digital Technologies," is an invitation to scholars and practitioners alike to submit work that spans the full spectrum of research, from theoretical foundations to the application of digital solutions in real-world scenarios. Whether it is elucidating the role of digital technologies in enhancing environmental advocacy or detailing the application of IoT in creating more sustainable production processes, this Special Issue aims to serve as a platform for diverse insights and innovative solutions that are conducive to sustainability. We are particularly interested in contributions that not only address current challenges but also propose forward-thinking solutions that pave the way for a sustainable and resilient future. We are pleased to invite you to contribute to this Special Issue of *Sustainability*.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
