

Special Issue

Sustainable Operations, Supply Chain Management, and Business Analytics: Design, Data-Driven Optimization Models, and Performance Evaluation

Message from the Guest Editor

This Special Issue aims to explore advanced methodologies, benchmarking frameworks, performance evaluation techniques, and data-driven optimization models that enable organizations to achieve sustainable outcomes across their operational and supply chain activities. We invite original research articles, comprehensive reviews, and case studies addressing key issues such as sustainable procurement, green logistics, circular economy practices, carbon footprint reduction, eco-efficiency enhancement, ethical supply chains, and resource efficiency. Papers focusing on benchmarking sustainable practices, performance metrics and evaluation frameworks, and the role of business analytics in sustainable decision-making processes are particularly welcomed. Additionally, studies highlighting the integration of artificial intelligence, big data analytics, and data-driven optimization techniques to enhance sustainability performance and drive continuous improvement are strongly encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
