

Special Issue

Sustainable Ecosystems of the Mediterranean Area

Message from the Guest Editors

The modern lifestyle poses significant challenges across all areas of society, particularly concerning sustainability in agriculture, fisheries, food production, and technology development. Climate change significantly impacts soil erosion and fisheries, exacerbates pest and disease problems in both sectors, and disrupts traditional practices. Concurrently, pollution and biodiversity losses compound the difficulties faced by these sectors, which are also under pressure to produce more nutritional and higher-quality food products to meet rising demands.

Sustainable solutions require innovations in technology development and the integration of digitalization. Therefore, we invite eminent experts from the academic community and researchers to present their current knowledge and new opportunities related to the sustainability of marine and agricultural ecosystems, as well as innovations in food production and digitalization, with a focus on the Mediterranean. We aim to foster a comprehensive understanding of the interplay between environmental sustainability and technological innovation in the Mediterranean context.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
