

Special Issue

Sustainable Heritage Tourism

Message from the Guest Editors

In the context of tourism promotion, sustainability is now a fundamental dimension for both the management and enhancement of cultural and territorial heritage. The fundamental objective of this Special Issue is therefore to present tourism or rather “tourisms” as practices and tools for accessing and enjoying tangible and intangible heritage, in particular with regard to respect for the environment in which these activities take place. Aiming for tourism that is more respectful of cultural heritage and the environment in general, based on the awareness that sustainability is a necessity, is a responsibility and at the same time an opportunity for growth for the entire tourism industry and for current and future generations, who must be taught a transversal model of sustainability (environmental, economic and social) that allows us to build a more sustainable world in the future through responsible individual and collective choices. This Special Issue therefore intends to collect a series of proposals from scholars who can offer proposals for implementing more environmentally friendly forms of tourism.

Guest Editors

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
