Special Issue

Advancing Landscape Ecology Within Sustainability and Resilience Perspectives

Message from the Guest Editors

With humankind facing increasingly complex and diverse environmental and socio-economic challenges, comprehensive insights from across fields and disciplines are becoming necessary to achieve the goals of resilient and sustainable development. The purpose of this issue is to present the contribution of sustainability and resilience perspectives to the conceptual and methodological study of landscape ecology. This Special Issue encourages original research papers and reviews from various fields to provide new insights and implications for the following, but not limited to: -Conceptual and methodological advances in landscape ecology;

- -How landscape interactions and teleconnections contribute to sustainable development goals;
- -The impact of landscape form, composition and configuration on resilience;
- -Assessment, patterns, drivers and simulation of landscape risk;
- -Landscape design practices with low carbon constraints;
- -Implications of multi-scale features for effective landscape management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
