Special Issue

Sustainable Growth and a Resilient Environment: Theory, Application and Practice

Message from the Guest Editor

Sustainability is an ethical issue. Thus, theoretical models are essential to identify the ethical assumptions and ethical implications of any sustainability paradigm that is chosen to solve an ethical problem (Zagonari, 2022, Environmental Ethics, Sustainability and Decisions: Literature Problems and Suggested Solutions, Springer Book). Furthermore, sustainability is a practical issue. Numerical insights from the application of theoretical models based on real data are essential to solve practical and ethical problems.

This Special Issue aims to support and spread a methodology. All papers are welcome, so long as they offer practical insights into sustainability policies or projects based on the numerical application of a theoretical model, regardless of the sustainability paradigm adopted or the practical problem analyzed, by clearly highlighting both ethical assumptions and ethical implications. We aim for this Special Issue to act as a precise methodological reference for the wide range of literature on sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
