

Special Issue

Advances in Green and Sustainable Construction Materials

Message from the Guest Editors

The awareness of our energy situation and the goal of carbon neutrality has led to the development of sustainable construction materials. This Special Issue explores a range of topics, including the development of eco-friendly materials, the use of recycled and renewable resources, and the integration of sustainable practices in construction processes. By focusing on carbon emission reduction, this Special Issue seeks to advance the field of green construction materials, offering insights into how the construction industry can mitigate its environmental impact and contribute to a more sustainable future. We welcome original research and review articles on the development of sustainable construction materials. Research articles may focus on the following topics, but novel research work on the broader domain of ecosystem services is also equally welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
