

Special Issue

Urban Resident Participation and Sustainable Urban Environments

Message from the Guest Editors

The sustainability of urban environments is not only about reducing ecological footprints but also about cultivating environmentally conscious, healthy, and resilient communities. This Special Issue explores the human dimensions of urban sustainability by analyzing how environmental perceptions, pro-environmental behaviors, and social engagement shape the transition toward more sustainable urban environments. Urban residents actively shape urban environments. Their environmental awareness, behavior, and risk perceptions influence governance effectiveness, while urban environmental quality affects their well-being. This Special Issue invites multidisciplinary contributions from environmental studies, sociology, and related fields.

Topics include (but are not limited to):

- Environmental awareness and education;
- Pro-environmental behavior;
- Public participation and environmental governance;
- Environmental risk perception and communication;
- Digitalization in urban environmental governance;
- Urban climate change mitigation and adaptation;
- The innovative design of urban environmental policy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
