

Special Issue

Sustainable Supply Chain Management: Innovation, Cross-Tier Integration, and System-Wide Transformation

Message from the Guest Editors

This Special Issue aims to advance the integration of sustainability principles across supply-chain functions, tiers, and stakeholder groups while fostering innovation, collaboration, and long-term value creation. It seeks to explore strategies, technologies, business models, and governance practices that enable supply chains to become environmentally responsible, socially equitable, economically viable, digitally enabled, and resilient. By emphasizing innovation, cross-tier integration, and system-wide transformation, the Special Issue aims to strengthen sustainability performance, resilience, competitiveness, and value creation throughout the supply network. We welcome conceptual and review articles, as well as empirical, analytical, optimization-based, data-driven, case-based, and mixed-method studies that offer clear theoretical contributions and practical implications for management or policy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
