Smart and Responsible Tourism: Innovations for a Sustainable Future

Message from the Guest Editors

In an era of dynamic technological development, globalization, and easy access to transportation, travel has become fast, accessible, and increasingly affordable. The world is becoming increasingly open, and national borders are becoming easier for the average person to cross. On the one hand, this opens up great opportunities for discovering new places, cultures, and experiences, but on the other, it leads to negative environmental impacts, including an increased carbon footprint and an increased risk of tourists degrading infrastructure, heritage, monuments, and natural resources. Referring to these challenges, there is a lot of theoretical and practical research conducted to develop various solutions, methods, and approaches related to responsible modern tourism. Therefore, we invite researchers and practitioners to publish scientific articles on smart and responsible tourism. We encourage you to submit papers on topics connected with the use of innovations and modern technologies. These include, but are not limited to, the following: artificial intelligence, virtual reality, the Internet of Things, digital tools supporting tourists, Industry 4.0 solutions in tourism, and etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
