

Special Issue

Quality Management and Supply Chain Management for Sustainable Development

Message from the Guest Editors

The efforts of supply chain and quality management improve each other's performance and the integration between the two functions may be beneficial for an organization in many ways. Environmental management standards are a good complement to quality management systems, and on their basis you can develop an integrated supply chain management system focused on quality improvement and implementation of pro-ecological activities, facilitating the same processes of monitoring and improving the concept of sustainable development in the supply chain. This Special Issue looks for outstanding research and development results, case studies, and review papers in topics that include, but are not limited to:

- Sustainable Supply Chain Management (SSCM);
- Standardized management systems;
- Supply Chain Quality Management (SCQM);
- The Impact of Supply Chain Quality Management Practices on Sustainability Performance;
- The Impact of Supply Chain Quality Integration on Green Supply Chain Management;
- The impact of Quality Management Practices on Sustainable Product Development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
