

## Special Issue

# Waste Management Policy for Sustainable (Peri-)Urban Development and the Circular Economy

### Message from the Guest Editor

Recent studies have provided strong evidence that the public's fundamental misunderstanding of waste reduction and prevention is a significant obstacle to promoting a critically needed circular economy in terms of waste reduction and reuse practices. Researchers, policymakers, and practitioners should educate metropolises' consumers together to inspire them to go beyond recycling and make decisions that minimize the environmental effects of their initial purchases. This Special Issue aims to reveal key insights about the public's waste prevention knowledge gaps and attitudes toward waste by putting together ethnographic studies, waste compositional or life cycle analyses, multi-criteria decision-making approaches. By highlighting the EU's efforts in this area, we hope to spark a productive discussion and prompt urgent policy-wise action for circular economy and sustainable urban development through waste management and sustainable consumption among researchers, policy-makers, and behavior-change practitioners. Keywords

- Circular and bio-based economy
- Cross-disciplinary sustainable development
- Solid/food waste
- Urban resilience

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
