

## Special Issue

# Digital Transformation and Green Technology for Sustainable Building and Construction Management

### Message from the Guest Editors

This Special Issue addresses the critical need for innovation in the construction industry, which has historically lagged in productivity and digitalization. It highlights the transformative potential of integrating digital transformation (DT) and green technology (GT) to establish a sustainable building and construction ecosystem. This Special Issue focuses on smart construction technologies like AI, big data, BIM, and advanced sensing, emphasizing their role in enhancing efficiency, decision making, productivity, and safety. Furthermore, it underscores the significance of green technology, exploring energy-efficient practices and waste reduction for a more sustainable sector. The Special Issue also examines how DT can be a powerful tool for sustainable construction management through applications like BIM-based life cycle assessment and AI-driven energy optimization. Ultimately, this Special Issue welcomes original research and reviews on various topics related to the application of DT and GT for a more innovative and sustainable future in building and construction.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
