Sustainable Operational Strategy and Logistics in Freight Transport

Message from the Guest Editors

In the face of dynamic climate changes, growing societal and economic demands, and advancing globalization, logistics and transport have become crucial components of sustainable development. Modern transport and logistics companies are searching for innovative solutions to minimize their environmental impact while simultaneously improving operational and economic efficiency. The development of new technologies, such as artificial intelligence, mathematical modeling, and advanced methods for designing transport networks, opens up new perspectives for building sustainable transport and logistics systems. Intermodal transport, as one of the cornerstones of contemporary sustainable transport strategies, particularly requires further research and innovative approaches to the design and management of its structures. We invite authors to submit articles showcasing innovative approaches, practical solutions, and potential development directions for sustainable strategies in freight transport. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
