

## Special Issue

# Sustainable Enterprises under Circular Economy: Knowledge, Policy, and Practice

### Message from the Guest Editor

Sustainable enterprise is committed to implementing sustainability principles into its business decisions, operations and supply chains to offer green products or services. Sustainable enterprises involve resource optimization, energy conservation, waste prevention and pollution control, contributing to the transition towards a circular economy. Considering such importance of sustainable enterprises for the circular economy, we propose a special issue in the Journal of 'Sustainability' that highlights the knowledge, policy and practice regarding sustainable enterprises under a circular economy. The editorial team welcomes academics and practitioners to submit papers that contribute both knowledge and policy. This special issue will accept submissions in all areas of sustainable enterprises, but special consideration will be given to the following topics: Corporate governance of sustainable enterprises  
Prospects and challenges for sustainable enterprises  
Innovation in sustainable enterprises  
Corporate social responsibility and sustainable enterprises  
Entrepreneurship in sustainable enterprises  
COVID-19  
Pandemic and sustainable enterprises

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
