

Special Issue

Soil Science and the Latest Studies on Sustainable Agriculture

Message from the Guest Editor

The promotion of sustainable agriculture, food security and the protection of terrestrial ecosystems are included in the 17 Sustainable Development Goals of the 2030 Agenda. In our globalized world, sustainable and climate-smart agriculture is extremely important.

Therefore, new ways to increase crop productivity while improving soil health and fertility are constantly being sought. The aim of this Special Issue is to draw attention to sustainable soil management, modern agricultural and environmental practices that promote sustainable development and agroecosystem health. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: soil health and fertility, the relationship between soil and plants, agroecosystems resilience, climate-smart agriculture, organic farming and agroecology, the method of fertilizer application, reduced use of chemical fertilizer and pesticides, beneficial microorganisms, advanced techniques for real-time monitoring of soil conditions, and many others.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
