

Special Issue

Advances in Indoor Environmental Quality Control and Green Buildings

Message from the Guest Editor

Indoor Environmental Quality (IEQ) is a requirement for a healthy and productive environment. Studying its condition might improve the quality of life for users either in buildings or any other space where people spend a significant part of their time. Green buildings aim to decrease the negative impact on the environment and improve quality of life, providing sustainable spaces for occupants and reducing the environmental footprint of buildings. This Special Issue is open to any subject area relating to indoor environmental quality, promoting health and well-being related to green buildings. Research papers, literature reviews, and case studies are welcome. Potential topics include, but are not limited to, the following:

Air Quality (Smart Ventilation Systems);
Energy Efficiency and Sustainable Design for Green Buildings (net zero buildings, green roofs);
Sustainable Building Materials (renewable materials);
Water Conservation;
Lighting and Thermal Comfort;
Green Building Lifecycle;
Building Certification Systems (LEED, BREEAM);
Green buildings for Mitigating Urban Heat Islands;
Biophilic Design;
Carbon Neutrality and Sustainable Development Goals.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
