

Special Issue

Corporate Environmental Responsibility for a Sustainable Future

Message from the Guest Editor

Sustainability requires organisations to consider the way they operate and how environmental, social, and economic factors shape the way they do business and ensure that organisations conduct their operations in an environmentally sustainable manner. This aim encompasses proactive approach to reduce carbon footprints, minimise waste, conserve resources, and support biodiversity. It reflects their environmental responsibility (called Corporate Environmental Responsibility (CER), a subset of Corporate Social Responsibility (CSR)) to mitigate the risk of their negative effects and organisational activities on the planet and to acknowledge such a responsibility. By incorporating environmentally responsible practises, organisations can reduce their ecological impacts. The critical areas of focus in CER include crucial areas such as energy management and waste management. The research underpinning CER will contribute to sustainable and related practises.

In this Special Issue, our aim is to define and quantify sustainability, measure and monitor sustainability (including sustainability tools), applications of sustainability, policies and laws relating to sustainability, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
