Special Issue

Sustainability in the Digital Age: The Role of Artificial Intelligence in Transforming Value Chains and Life Cycles

Message from the Guest Editor

This Special Issue aims to explore how Al-driven innovations can enhance sustainability across different sectors while critically assessing the challenges of practical implementation and the potential unintended consequences. This Special Issue will examine Al's role in driving sustainability transformations within modern value chains and life cycles, emphasizing its environmental, social, and economic dimensions. Topics of interest include Al applications in sustainable manufacturing, supply chain optimization, waste reduction, carbon footprint minimization, and energy efficiency. We invite researchers from diverse disciplines-including computer science, environmental science, engineering, business, and social sciences-to contribute to this interdisciplinary dialogue. By addressing the interplay between AI, digital transformation, and sustainability, this Special Issue aims to provide a comprehensive and critical perspective on Al's transformative potential in creating sustainable value chains and life cycles.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
