Special Issue

Advances in Sustainable Water and Wastewater Treatment: Emerging Technologies and Solutions

Message from the Guest Editors

This Special Issue explores the latest innovations and methodologies in the field of sustainable water and wastewater treatment, with a focus on emerging technologies and solutions. The scope of this SI encompasses the development and application of cutting-edge technologies such as the removal of micro-pollutants, the treatment of refractory wastewater, carbon reduction technology for wastewater, and biological treatment systems. Additionally, this Special Issue covers the biological metabolism model, bioreactor model, the pollution and removal of heavy metals from wastewater, the resource utilization of wastewater, and other topics. The purpose of this SI is to promote sustainable water and wastewater treatment, explore the advances in lowenergy and low-carbon wastewater treatment technologies, and minimize the impact of water pollutants on the environment. By examining case studies and recent advancements, this Special Issue aims to highlight practical and scalable solutions that can be implemented worldwide and serve as good examples for the advancement of water and wastewater treatment technology. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
