

## Special Issue

# Natural Resource Management and Sustainable Tourism

### Message from the Guest Editor

Due to various changes in the environment surrounding tourism, including the pandemic, the development of AI, and so on, strategies for maximizing the efficiency of corporate management or individual selective behaviors are also changing in line with environmental changes. Thus, this Special Issue aims to discuss issues of management and economics in the tourism industry that can cope with current changes in tourism environments. Potential issues include 'green growth management in tourism', 'technology in tourism', 'climate change and management', and so on. That is, research that takes a management or economic approach to study a tourism topic that has recently become an issue will be highly relevant to this Special Issue. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Artificial intelligence;
- Climate change;
- Smart tourism;
- Tourism resource management.

I look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
