

Special Issue

Corporate Social Responsibility and Sustainable Economic Development

Message from the Guest Editors

In the face of unprecedented environmental and social challenges, the role of businesses in promoting sustainable development has become increasingly vital. Sustainability is now a fundamental aspect of the modern world, necessitating that businesses engage in socially responsible activities to contribute to global prosperity. It is widely acknowledged that business operations inherently impact employees, society, and the environment. These linkages influence the success and longevity of businesses, prompting a growing number of companies to adopt socially responsible practices to ensure sustainable development.

Companies are incorporating social, environmental, ethical, consumer, and human rights considerations into their business strategies and operations to achieve social responsibility. Corporate social responsibility (CSR) facilitates the sustainability and innovation of businesses, thereby contributing to a more sustainable economy. This Special Issue aims to collect articles that will improve our understanding of how integrating CSR into core business strategies can lead to sustainable development, benefiting both businesses and the broader community.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
