

## Special Issue

# Climate Change Adaptation, Disaster Risk Reduction, and Sustainable Development

### Message from the Guest Editor

The Special Issue we propose to address is centered on the critical and interrelated themes of Climate Change Adaptation, Disaster Risk Reduction, and Sustainability. The overarching goal is to explore innovative strategies and policies that can effectively mitigate the adverse impacts of climate change while simultaneously enhancing community resilience to natural disasters and promoting sustainable development. The focus of this Special Issue will be on interdisciplinary research that integrates insights from environmental science, social policy, economics, and urban planning to address the multifaceted challenges posed by climate change. The scope will encompass case studies, theoretical frameworks, and practical policy recommendations that can be implemented at local, national, and international levels. The purpose is to provide a comprehensive understanding of how adaptation and risk reduction can be harmoniously integrated into the broader context of sustainability.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
