# Sustainable Building: Risk Assessment and Occupational Safety in Construction Management

### Message from the Guest Editor

The construction industry is one of the major direct contributors to development. It encompasses various large- and small-scale activities, such as building. resulting in various structures as their main product. It also plays a role in determining quality of life through creating living and working conditions. Generally, sustainability aspects must be included in a building's physical and technical conditions and construction management by setting a high environmental standard. This Special Issue intends to provide an overview of the most recent advances in multidisciplinary research connected to sustainable building, risk assessment, occupational safety in construction management, and the enhancement of environmental standards, safety, and the operability of process systems. Research articles are invited on topics associated with sustainable buildings, as well as analyses of environmental aspects, green-building concepts, and occupational safety in construction management, including risk modelling, assessment, technique regulation, environmental conditions, and reliability of technological systems in buildings.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
