

Special Issue

Innovative Materials for Sustainability: From Laboratory to Applications

Message from the Guest Editors

In recent years, an interest growth for the production of innovative and sustainable materials, designed for a host range of applications (i.e. structural and non-structural building materials, environmental governance), has been observed. The design of these material have to meet the challenge of the environmental footprint reduction through more sustainable technological processes, such as the alkali activation process, as well as the energy and virgin materials consumption reduction and waste generation, as required by the sustainable development goals (SDGs). In this context, becomes likewise essential re-thinking the waste values shifting the production line from linear to circular. The purpose of the Special Issue "Innovative Materials for Sustainability: From Laboratory to Applications" is to provide a deeper knowledge in the field of sustainable materials in a perspective of circular economy, focusing on the actual opportunities of technology transfer from laboratory to real applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
