# **Special Issue**

# A Systems Approach to Urban Greenspace System and Climate Change

### Message from the Guest Editors

Urban green spaces (UGS) offer cities opportunities to combat climate change in diverse ways. This Special Issue seeks to present current UGS research with a specific focus on conceptualizing urban green spaces as interconnected elements within a system, rather than isolated entities. The objective is to underscore how UGS, when considered holistically, can yield both social and environmental benefits in supporting a community's initiatives against climate change. Suggested themes: 1. Examining the contribution of urban greenspace systems to urban livability. Another emerging focus to understand the use of green space is the inclusiveness in accessing the green space by different community groups; 2. Investigating the role of green spaces in bolstering urban resilience, particularly in aiding cities in dealing with extreme meteorological events; 3. Assessing how green spaces contribute to cities' efforts in reducing environmental impact through adept stormwater management, energy conservation, the mitigation of greenhouse gas emissions, etc.; 4. Examining how green spaces are planned, designed, developed, financed.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
