

Special Issue

Solar as Renewable Energy Resources in Developing Countries

Message from the Guest Editors

The advancement of technology for solar energy as a renewable energy supply has soared tremendously. Rigorous research in this area has been seen lately, especially in developing countries. Hence, this Special Issue intends to capture all recent prominent research that focuses on the use of solar energy as a renewable energy source. The topic will cover any research that supports the advancement of solar energy, i.e., materials, circuit topologies, and control strategies applied for circuit and system levels and related energy management. The topic of interest includes, but is not limited to, the following: Solar cell material technology; Theoretical modeling of DC and AC PV systems; Power electronics circuit for solar energy harvesting; Simulation and experimental performance; PV energy storage systems; Solar thermal power plants; PV thermoelectric technology; Grid-connected solar power plants; Solar pond; Agri-voltaic; Underwater solar and its applications; Environmental impacts of solar; Solar microgrids; Solar for smart home; Solar roofs and EV charging stations; Solar for hydrogen production; Solar for fuel production;

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
