Special Issue

Sustainable Management of Physical Assets

Message from the Guest Editors

Nowadays, physical assets are finally assuming the importance that they have always had. Many companies depend on physical assets, and the final value of products and services have a significant incorporation in the value of physical assets. Because of this, the life cycle analysis of physical assets becomes a strategic subject that organizations must evaluate regularly. Physical assets also must be analysed carefully, aiming to guarantee or improve their reliability. This is because condition-based maintenance, predictive maintenance and dynamic modelling is particularly important. It can be concluded that it is necessary to have an excellent organization and management of physical assets, in conjunction with the best maintenance policies, to reach the maximum physical asset availability, in order to achieve their maximum productivity. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Life cycle assessment
- Standardization and certification
- Predictive maintenance
- Models of artificial intelligence
- Data architecture and governance
- Sensing
- Energy

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
