

## Special Issue

# Agricultural Economics, Policies, and Rural Development for Sustainability

### Message from the Guest Editors

The issue of agricultural economics and rural development is one of the most complex problems of our time, due to the fact that, in essence, it involves achieving a balance between the requirements to preserve rural space economically, ecologically and socio-culturally, in conjunction with the tendency to “modernize” rural life. At the same time, rural development is at the confluence of the tendency to expand urban areas, the “aggressive” development of industry at the expense of rural areas, and the requirement to maintain, as far as possible, rural areas at their current values and dimensions.

- sustainable development
- agricultural economics and policy
- common agricultural policy
- rural development
- sustainable rural development strategy
- circular economy in agriculture
- agricultural management and marketing
- climate change
- economics and environmental policy

---

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
