

## Special Issue

# Digital Governance and Digital Innovation for Sustainable Development

### Message from the Guest Editors

The current decade is considered one of digitalization, in which nations around the world have formulated digital goals. In this context, digital governance and digital innovation aim to include digitalization in organizations' current activities to stimulate the creation of added value, as well as to achieve a sustainable impact. All of this favors managerial creativity in adopting the best business strategies and solutions. This Special Issue aims to highlight contributions on promoting digital governance and digital innovation. Research areas may include (but are not limited to) the following:

- Innovative solutions that incorporate digitalization into organizational governance processes and ensure sustainable development
- Developing green software and engineering that contribute to sectoral greenhouse gas emission reduction objectives
- Green cloud migration that helps organizations make sustainability-based decisions for cloud migration
- Economic sustainability that defines appropriate cost levels and structures through green software practices

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
