

Special Issue

Sustainability Education through Green Infrastructure

Message from the Guest Editors

This Special Issue examines sustainability education in, of, and for green infrastructure. This work starts to reveal the ways that green infrastructure is both a 3D communication tool for sustainability and a source for rich formal and informal science lessons that integrate human–ecological systems. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Green infrastructure (urban spaces, buildings, interiors, products) as a tool for science communication;
- Formal and informal environmental education interventions involving sustainably built products and/or environments;
- Case studies of educative green infrastructure projects;
- Social research with occupants of green infrastructure projects;
- Green infrastructure is designed to increase environmental awareness, knowledge, attitudes, or behaviours;
- Education for Sustainable Development.

We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
