

Special Issue

Corporate Social Performance, Responsibility and Value

Message from the Guest Editor

This Special Issue, “Corporate Social Performance, Responsibility and Value”, aims to develop research on corporate social responsibility (CSR) and provide implications for firms to improve their value sustainably. With global climate warming and natural environment deterioration, CSR is not an activity in response to pressure from firms’ stakeholders, but a movement for sustainable competitiveness and value growth. Specifically, this Special Issue publishes theoretical and empirical research that strengthens our understanding of the impact of corporate social responsibility on firm value, and of the underlying mechanisms. The scope of this Special Issue includes, but is not limited to:

- New categories and measures of CSR performance;
- Digital transformation and CSR practices;
- Practices of ESG under the background of carbon peaking and neutrality goals;
- The relationship between CSR and firm value in different situations (e.g., life cycles, industries, countries, legal systems, and so on);
- CSR and green innovation;
- Green innovation and high-quality development;
- CSR disclosure and business ethics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
