Special Issue

Strategies to Achieve Sustainable Development Goals for Health and the Environment

Message from the Guest Editor

The 2023 Global Sustainable Development Report (GSDR) underlines that the implementation of the 2030 Agenda for sustainable development "requires the active mobilization of political leadership and ambition for science-based transformations". This Special Issue focuses on health- and environment-related development goals (SDGs) such as ending hunger, achieving food security and improved nutrition, and promoting sustainable agriculture; ensuring healthy lives and promoting well-being for all at all ages, including research on formal and informal education for sustainable lifestyles; ensuring the availability and sustainable management of water and sanitation for all; making cities and human settlements inclusive, safe. resilient and sustainable; ensuring sustainable consumption and production patterns; and taking urgent action to combat climate change and its impacts. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- sustainable development goals
- health and its determinants
- health promotion
- environmental health

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
