

Special Issue

Geochemistry of Sustainable Resources from Partial Melting in the Lithosphere to Mineralisation in the Upper Crust

Message from the Guest Editors

This Special Issue collects geochemical and petrographic data of magmatic rocks representing ore deposits that can be exploited as raw materials, particularly resources containing copper, rare earth elements, lithium, cobalt, manganese, nickel for computers and phones as well as tellurium and silica for solar cells. These materials can be utilized to make new technology that will help the Earth become a cleaner, greener place. For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: quantitative approaches to define the magmatic processes from partial melting in the source to emplacement in upper crust; relevant mineral resources related to magmatism; sustainable resource management. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
