Special Issue

Transformation and Sustainability in Higher Education: Emerging Issues and the Research Developments

Message from the Guest Editors

The Special Issue aims to investigate the critical role of higher education institutions (HEIs) in promoting the United Nations' Sustainable Development Goals (SDGs). The concept of sustainability is multidimensional, affecting all aspects of life-educational, social, environmental, and economic-in such a way that either the progression or regression of one dimension affects the others, with universal consequences. Responding to sustainability needs, values, and competences, HEIs need to redefine their goals, content, and modes of delivery of their programs, as well as expand their internalization and partnerships with institutions and other bodies beyond universities. Moreover, the rapid development of AI is driving systemic changes in every function and aspect of academic institutions and not just in the context of the aims and methodology of teaching and learning. The Special Issue invites original theoretical and research articles investigating the emerging issues and recent developments in the transformation and sustainability of higher education in a rapidly changing world.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
