

## Special Issue

# Soil Restoration and Sustainable Utilization

### Message from the Guest Editor

- With increasing pressures from climate change, agricultural intensification, and urbanization, developing effective strategies to restore degraded soils and enhance their long-term productivity is essential. The scope of this Special Issue encompasses innovative approaches to soil rehabilitation, including bioremediation, conservation agriculture, organic amendments, biochar application, and policy frameworks promoting sustainable land management. We encourage interdisciplinary contributions that integrate microbiology, agronomy, geochemistry, remote sensing, and socio-economic analyses to provide holistic solutions.
- By fostering collaboration among scientists, policymakers, and practitioners, this Special Issue aims to bridge the gap between theoretical research and real-world applications. We invite original research articles, reviews, and case studies that explore scalable and sustainable soil management practices, particularly in understudied regions. This Special Issue will serve as a valuable resource for researchers, stakeholders, and policymakers working toward achieving the UN Sustainable Development Goals.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
