Special Issue

Food Security and Nutrition and Sustainable Agriculture

Message from the Guest Editors

Today, we face huge challenges worldwide due to climatic changes and more frequent extreme weather events, which directly affect food security and agricultural production. This compromises livelihoods that are under pressure. Indeed, the increasing global population is putting more pressure on the food production sector worldwide. This Special Issue, entitled "Food Security and Nutrition and Sustainable Agriculture", aims to gather expertise in the different complementary and non-complementary fields related directly to food security, food security and nutrition, the sustainable production of foods, and the eco-efficiency of agricultural systems. Indeed, papers that analyze the supply chains of foods and the ethical concerns of production and consumption are also welcome. The main aim is to solve the above challenges and provide new insight into research, presenting directions to tackle the present concerns based on the Sustainable Development Goals of the United Nations. Herein, the Sustainable Development Goals are used as a framework of the topics contextualizing the scope of this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
