Green Cosmetics: Syncing Nature and Hygiene

Message from the Guest Editors

Cosmetic products are used in daily life for enhancing beauty, keeping skin clean, and protecting skin from dust and sun. Cosmetics not only provide good hygiene, but they can also boost confidence during social interactions. Recent trends in the world market focus on the development of cosmetics and cosmeceutical products made from natural ingredients made from organic or healthy materials. As the name implies, the concept of green cosmetics concentrates on production of environmentally friendly products from nature-sourced ingredients by eco-friendly processes. Since sustainability will be of great importance in the production of green cosmetic products, it is necessary to consider sustainable materials such as renewable ingredients and by-products from industries and agriculture. Furthermore, discovering new sources or new natural ingredients is one of the many ways in improving sustainability when it comes to green cosmetics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
