

Special Issue

Production and Operations Management Powered by Artificial Intelligence and Data Analytics

Message from the Guest Editors

This Special Issue aims to promote the use of artificial intelligence and data analytics in production and operations management. We are especially interested in papers that use one or more of the following modeling and solution methods: artificial intelligence, data analytics, machine learning, optimization, simulation, and meta-heuristics. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Sustainable production and operations management;
- Production and operations management based on artificial intelligence (machine learning, data mining, metaverse, etc.);
- Production and operations management based on data analytics;
- Data-driven production and operations management;
- Production planning and scheduling;
- Project management and scheduling;
- Logistics and supply chain management;
- Information systems and operations management;
- Product innovation and technology management;
- Optimization models and exact/meta-heuristic algorithms in production and operations management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
