

## Special Issue

# Achieving Sustainable Development of Enterprises through Digital Transformation

### Message from the Guest Editor

This special issue aims to advance research and present case studies in sustainable development through digital transformation. The collection of papers will be of interest to scholars in the field. Sustainability is not just environmentalism. In addition to natural resources, we also need social and economic resources. Included in most sustainability definitions, we also find social equity and economic development concerns. Digital transformation is a fundamental change process, enabled by the innovative use of digital technologies accompanied by the strategic leverage of critical resources and capabilities, aiming to improve an entity radically and redefine its value proposition for its stakeholders. Many academic initiatives deal with sustainability, while others discuss digital transformation. There is no integrated view of these two approaches labeled. This special issue aims to present contributions to finding innovative ways to analyze and design the support of sustainability and digitization to create transformative innovation.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
