Special Issue

Valorization of Renewable Resources for the Production of Biobased Products through the Implementation of Circular Bio-Economy Principles

Message from the Guest Editors

The increasing generation of waste and the reduction of primary resources are major problems of modern society closely interlinked with escalating raw material costs. The transition to a low carbon economy must be based on the utilization of renewable resources incorporating novel technologies and bioprocessing to provide clean energy, green chemicals, biodegradable and safe products of high quality and functionality. Contributions to this Special Issue may include empirical studies, case studies, and comparative and theoretical studies. Topics include, but are not limited to:

- Biomass pretreatment and waste valorization
- Biorefinery development for bio-based products
- Recovery of values added products from agricultural waste streams
- Sustainable production of biobased products
- Biofuels towards a carbon neutral economy
- Sustainable applications in food formulations, packaging, cosmetics, pharmaceuticals, etc.
- Development of bio-economy business models
- Sustainability challenges and aspects of the circular economy
- Life cycle assessment for bio-based production using renewable resources
- Policy and social strategies, finance and the transition towards a circular bioeconomy

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
