# **Special Issue**

# Application of Remote Sensing to the Monitoring of Land Cover and Water Environment

# Message from the Guest Editors

Urbanization, dense population and the utilization of natural resources continually exert pressures on the Earth, resulting in increasingly prominent environmental problems. Remote sensing technology can obtain information on the Earth's surface over a large area in a short time, and has been widely used in environmental monitoring and assessment. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: (1) Reviews on remote sensing applications to land cover and water environment monitoring, (2) Understanding land cover in urban and rural areas with high-resolution remote sensing images; (3) Change detection and analysis of land cover types and water in urban and rural areas by remote sensing techniques; (4) Developing remote sensing methods of monitoring the environmental conditions of water; (5) Identification, assessment and response to disasters associated with land and water (e.g., earthquake, earth surface subsidence, red tide, oil spills in marine environments).

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
