Special Issue

Ecodesign of Products and Sustainable Manufacturing

Message from the Guest Editors

China is vigorously promoting carbon neutrality goals, while industrial transformation guided by new quality productivity is accelerating. A service-oriented manufacturing model that integrates manufacturing and services is also being constructed. We hope to see whether companies can better promote sustainable manufacturing under the guidance of the strategies. Can enterprises establish a sustainable ecosystem to create green products that match their competitive advantages instead of losing benefits in pursuing green activities?

We welcomes papers related to green manufacturing, ecosystems, and new quality productivity, eg., green products based on service-oriented manufacturing; development of sustainable manufacturing industry under guidance of new quality productivity; sustainable manufacturing innovation based on a niche or an ecosystem; green innovation networks for manufacturing enterprises; sustainable development strategies for manufacturing enterprises; government's strategies, policies, and practices in sustainable manufacturing; construction of sustainable manufacturing systems in developing countries; examples of sustainable manufacturing in developed countries...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
