

Special Issue

Sustainable Construction Engineering and Construction Project Management

Message from the Guest Editor

The Special Issue invites scholars in construction project management and engineering to share their novel and innovative research on meeting the UN Sustainable Development Goals (SDGs). Academic publications on sustainability often do not engage with sustainability issues in theoretical or conceptual ways that go beyond a singular project. This represents a missed opportunity for industry and academia that necessitates contributions to learning that transfer across projects. This Special Issue invites contributions from construction researchers that engage with sustainability challenges from novel theoretical and conceptual perspectives. Papers can engage with construction sustainability challenges (i.e., people; processes; practices) from any phase of the construction project lifecycle. Additionally, papers that unlock under-studied topics related to construction sustainability that have been neglected in the academic literature are welcome. Such papers should also engage with sustainability by means of theoretical and conceptual approaches that are both novel and innovative whilst being appropriate and insightful.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
