

## Special Issue

# Digitalisation, Governance, and Innovation for Sustainable and Climate-Resilient Societies

### Message from the Guest Editors

This Special Issue investigates the interactions between digitalisation, governance quality, and innovation capacity, aiming to foster economic growth, support sustainable development, strengthen climate and social resilience, and address emerging societal challenges.

By integrating multiple scales of analysis (national, regional, local) and considering both economic and societal dimensions, the issue places digitalisation within a broader framework of inclusive, sustainable, and climate-adaptive development.

By examining these linkages across countries, regions, sectors, and governance levels, the Special Issue aims to identify the conditions under which digital and institutional transformations contribute to environmental sustainability, inclusive societal outcomes, economic development, and resilience to climate change. The overall goal is to generate robust evidence that informs governance reforms, digital strategies, climate adaptation policies, and innovation-driven pathways toward more resilient and equitable societies.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
