

Special Issue

Food Technology Hand in Hand with Sustainable Development

Message from the Guest Editor

Advanced food engineering and technologies for sustainable development are critical and fascinating fields today. They focus on innovation in the production, processing, and preservation of food in ways that are efficient, safe, and environmentally friendly. The main objective of these areas of study is to foster the development of innovative, technologically advanced solutions in food engineering that contribute to sustainability. This includes improving production efficiency, reducing environmental impact, ensuring food safety and quality, and promoting responsible practices that support long-term social and economic well-being. In short, the ultimate goal is to create a more sustainable, efficient, and healthy food system for the planet. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the use of new technologies to reduce waste, improve product quality, and promote sustainable practices throughout the food chain. I look forward to receiving your invaluable contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
