## **Special Issue**

# Advances in Sustainable Nanocomposites

## Message from the Guest Editors

The development of sustainable materials is accelerating in response to zero-carbon policy goals. Government agencies and organizations are pushing for the use of sustainable technologies as a way to deal with both rapid climate change and rising energy demand. The implementation of urban and futuristic sustainable materials technology is critical from an environmental perspective. The high specific strength, dimensional stability, and recyclability of nanocomposite materials make them ideal for use in environmentally friendly technological applications. The key themes of this Special Issue include (but are not limited to) the following:

- Life cycle assessment (LCA) of nanocomposites;
- Nanocomposites;
- Bioplastics and biocomposites;
- Recycled plastics;
- Composite manufacturing;
- Composite materials for energy applications;
- Fiber-reinforced polymer composite processing;
- Modelling and simulation;
- Coating and thin film materials;
- Lightweight composites;
- Tribological analysis for composite materials;
- Multifunctional composites.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
