

Special Issue

Crop Management and Sustainable Agriculture

Message from the Guest Editors

Integrated crop management is a holistic approach to agricultural production that optimizes crop yield while minimizing negative environmental impacts, and it combines various strategies to improve soil health, enhance biodiversity and reduce dependency on chemical inputs. Sustainable agriculture is a farming approach that aims to meet current food production needs without compromising the ability of future generations to do the same—it integrates the environmental, economic and social to ensure long-term agricultural viability. This Special Issue welcomes original research articles and review papers exploring various aspects of crop management and sustainable agriculture. Topics of interest include, but are not limited to, enhanced soil health and fertility, reduced chemical dependency, biological control methods, water-saving irrigation techniques, crop rotation, precision agriculture and eco-friendly and organic farming practices. Contributions covering other relevant areas that promote sustainable agricultural practices are also highly appreciated.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
