Investigation and Research of Sustainable Innovation in Built Environment

Message from the Guest Editors

Sustainable innovation is a multifaceted concept increasingly embedded in interdisciplinary research on the relationship between people, the environment, and society. Sustainable innovation creates new living conditions to promote sustainable development at four levels: individual, society, environment, and economic development. This process is not limited to technological change but includes changes in processes, social and environmental models, business systems, and individual lives. We start from the premise that the concept of sustainable innovation opens a new research paradigm on the development of humans, the economy, and the environment. This paradigm challenges the traditional and neoliberal ways that have prioritized production and consumption, competition, and the over-individualization of the individual over concern for a clean environment, health, well-being, decent work, and the right to education. Topics may include but are not limited to:

Sustainable innovation and environmental, social, economic, and individual growth

The role of sustainable innovation in the built environment

Case studies of sustainable innovation in the built environment

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
