Selected Papers from the European Biomass Conference and Exhibition: EUBCE 2025 and EUBCE 2026

Message from the Guest Editors

The European Biomass Conference and Exhibition Conference (EUBCE) has for many years been one of the world's leading R&D conferences, and over the last decade, it has increasingly recognized the continuing challenges facing policymakers across the world. The EUBCE has grown to become a leading platform for the collection, exchange, and dissemination of scientific knowledge in the field of biomass, as well as its utilization in industry to replace fossil fuel-derived energy and products and in policy making to mitigate climate change. The 33rd EUBCE, held in Valencia, Spain, in June 2025, addressed the key topic of building a circular economy by integrating biomass production and its conversion to bioliquids and biofuels, covering all aspects of each value chain, ranging from supply and logistics to conversion technologies, from the industrial application of research results in industry to impacts on the environment. The key aim established is to achieve “net zero” by 2050, or sooner, to halt the steady increase in the warming of the Earth's atmosphere, before reducing fossil fuel-derived emissions so that climate change impacts can be reduced.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
